RAM 744

The RAM 744 is the ideal monitor for portable applications and where space is limited. It is mounted with the filtration system, allowing for rapid response and eliminating the possibility of sample lines becoming blocked or crimped.

All GfG Instrumentation RAM instruments satisfy the requirements of OSHA rule 29 CFR 1910.134 (d) (2) (ii) for carbon monoxide monitoring. They will also monitor Grade E air, generally specified for breathing air in cylinders (SCBA).

The compact, portable "air case" encloses the three-stage 25, 50 or 100 CFM filter panel with the RAM 744 CO monitor in a rugged carrying case. All models have quick-connect inlets and outlets.

Any GfG Instrumentation RAM instrument can be custom-configured to meet the needs of the end user's exact specifications.

Gray Dimpled Universal Pads and Rolls

Dimpled meltblown polypropylene sorbents are single-layer, economical sorbents. We pass this media through our thermal bonder, which ties down loose fibers. Dimpled sorbents are also perforated, which promotes waste minimization.

Gray Fine Fiber Universal Pads and Rolls

Fine fiber meltblown polypropylene sorbents have a soft, super-absorbent fiber that resembles tissue paper. We thermally bond a thin layer to each side of our standard, coarse-fiber, meltblown polypropylene. These composites absorb quickly, remove the sheen, and grip cement floors.

Gray SpunBond Universal Pads and Rolls

Spunbond meltblown polypropylene sorbents have an exceptionally strong, ultra-light nonwoven that resembles polyester. This fabric's high level of tensile strength and durability does not hinder its absorption capabilities. Thicker fluids penetrate the spunbond membrane and saturate the highly absorbent meltblown center layer.

Gray SpunBond Fine Fiber Sorbent Rolls

Our industrial spunbond/fine fiber mats are great for hiding fluid stains and footprints. The stiff, durable, spunbond side faces up, and the soft, tacky, fine fiber side goes down. Perforated for ease of use, tear off what you need. Lay it down in walkways or in front of workstations and get back to work...Safely!

White Oil Only Pads and Rolls

Meltblown standard oil-only sorbents are typically used to skim oil off of water. The open fiber construction draws hydrocarbon- based fluids into the center of the pads and/or rolls while repelling water. This type of media is our most economical family of pads and rolls, yet it absorbs quicker and more than the other product families.
